

Did you know that you can have independence through transportation even if you don't own a car, have a bus or taxi service available !!

How can people get rides from Lyft? Anyone can use Lyft as their means of transportation. It is a simple process of downloading the Lyft app and following the instructions. View a video on how to set up the Lyft app “How to be a Lyft Rider” and “Rider Safety” videos on our website:

ConnectAbilityMN.org/those-we-serve/transportation/rider-program

What does it mean to ride with Lyft?

People from your own community sign up to be a Lyft driver. They have had a background check, driving record checked, and have insurance. They understand the need to offer transportation in your community and have stepped up to help.

You will know who the driver is, the color and kind of car, how long it will take before your driver arrives and how much the ride will cost before you take the ride. You can send updates about your ride to loved ones as an extra layer of security for you.

The cost of the ride varies by time of day and how far you need to travel. You will arrange for your ride through the app. Because this is an “at-will” ride, there may not be drivers available everytime you need a ride.

Assistance for new Lyft riders from ConnectAbility of MN.

- Eligible riders with waivers who register with us will receive a \$25 credit to set up their Lyft app
- Rides may be paid for by waivers for those that are supported by the MN DHS Waiver program
- Riders will be provided information on how to safely use Lyft
- Personalized individual ride training is available for those who qualify with our program.
