

How to drive as a Lyft Driver for only the person I want to assist?

Lyft is a great platform to provide transportation in your community. However, not everyone wants to provide rides for everyone. If you want to only provide drives for a particle person or a few people, that is possible and easy.

Steps:

Download the Driver Lyft app

Go through the process to become a driver

Download the Rider Lyft app on the person's phone you want to give a ride for.

When a ride is needed:

Prearrange the time the ride is needed via phone, text, email, or conversation.

At the appointed time arrive at the pick up address.

The Rider will use their Lyft app to request a ride.

The Driver will accept the ride as soon as it available.

Once the payment has been processed the Driver can turn off their Driver Lyft app.

What if a different Driver accepts the ride request before you get it?

If someone else accepts the ride request before you can accept it, the Rider declines the ride; they have 2 minutes to do this without penalty. The Rider simply waits a minute and requests a ride again and the Driver can accept the Ride request.
